

The **benefits** of taking part in research

- You will be contributing to the future of medicine
- You will be assessed and cared for by Synexus doctors and nurses
- You're offered specialist advice and support throughout the study
- You won't be asked to pay for anything and any reasonable travel expenses will be reimbursed should you be accepted onto a study

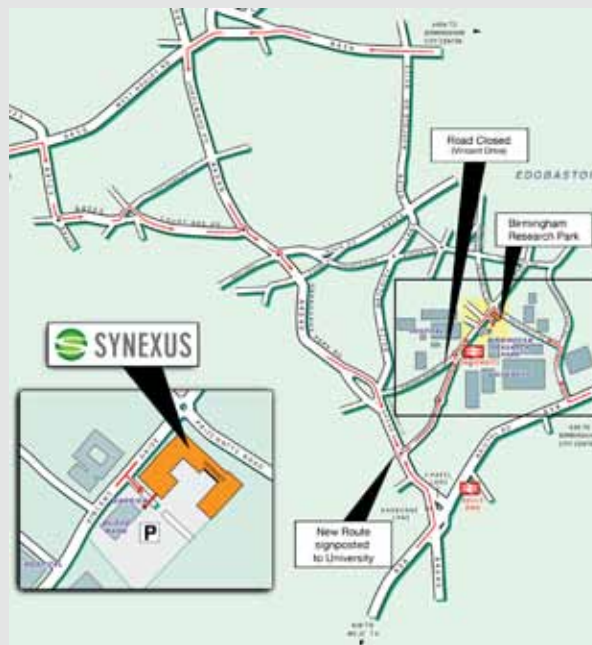

Find out about **getting involved**

If you wish to find out more about our current research opportunities, contact us using any of the details provided.

Our team will answer your questions; talk through your current health and advise you about any research you may be suitable for. If you wanted to go ahead, we will arrange a consultation with a doctor or nurse from your local Synexus clinic to give you full study details to take away and discuss with your family before you make a decision.

If you change your mind at any point, you don't need to give a reason. It won't interfere with any NHS treatments you're already receiving and we will keep your GP fully informed. You are under no obligation to continue once you've started the study.

How to **find us**

Synexus Midlands Clinical Research Centre
Birmingham Research Park
Vincent Drive
Edgbaston
Birmingham

Synexus Clinical Research **Midlands**

What we do and our experience

Synexus is a company dedicated to conducting clinical studies and have been investigating the effectiveness of new medicines and treatments for more than 20 years.

As the largest and most recognised clinical study organisation in the world, Synexus provide a friendly relaxed environment where you may have the opportunity to help medical developments.

Synexus Midlands

We have 8 clinics in the UK and 24 clinics around the world, each with its own dedicated team of highly trained doctors and nurses to provide our patients with the level of comfort and professionalism usually found in private healthcare.

Our Midlands centre was established 17 Years ago and operates from within the University of Birmingham Campus - the heart of a thriving clinical & scientific research community.

Areas of research

Synexus have vast experience in conducting research within the following therapy areas.

Our Facilities

We have 9 consulting rooms offering a welcoming and comfortable environment for our patients.

Our waiting area is stocked with complimentary refreshments and a selection of magazines and daily newspapers. We offer our fasting patients a range of breakfast bars, cereals and porridge too. We also provide private parking spaces solely for our patients and visitors.

Other in house facilities include 2 DEXA Suites, a low radiation X-ray technology used to measure the amount of calcium in bones, often referred to as Bone Mineral Density. Synexus Midlands also have a good relationship with the BMI Edgbaston and BMI Priory Hospitals who act as our main x-ray provider.

“ I found the staff at Synexus to be friendly and helpful. The doctors and medical staff made me feel that they had time for me and were very thorough in their treatment. The service I received from Synexus means I would be happy to recommend their studies.”
