

The patient's choice for clinical research

As the largest clinical study organisation in the world, we provide a friendly, relaxed environment where you have the chance to help shape the future of health for yourself and others.

Our waiting areas are stocked with complimentary refreshments and a selection of magazines and daily newspapers. Our fasting patients are supplied with hot and cold drinks and a wide variety of fresh fruit and biscuits

Our professional team are dedicated to providing the highest standard of service to all our visitors.

The benefits of taking part

You will be contributing to the future of medicine

You're offered specialist advice and support throughout the study

You will be assessed and cared for by qualified doctors and nurses who recognise the importance of delivering services with kindness, compassion, honesty and integrity, whilst ensuring the utmost patient safety

You will be joining the growing community of over 14,000 Synexus volunteers currently participating with us

We offer complimentary routine health checks; height, weight, body mass index (BMI), blood pressure monitoring and blood cholesterol checks

Our location

Synexus Manchester Clinical Research Site,
Kilburn House, Lloyd Street North,
Manchester M15 6SE

There is free parking in the designated Synexus visitor parking at Kilburn House.
Please do not use the main entrance to Kilburn House.
The clinic can be found on the left hand wing to the building and has its own entrance in the centre on the ground floor.

We're just a five minute taxi ride from Manchester's Piccadilly and Oxford Road Stations

A regular bus service operates between Manchester and it's neighbouring towns

The patient's choice for clinical research

Dedicated to conducting clinical studies, Synexus have been investigating the effectiveness of new medicines and treatments for more than 25 years.

We have 7 clinics in the UK and approaching 200 sites around the world, each with its own dedicated team of highly trained doctors and nurses to provide our patients with the level of comfort and professionalism usually found in private healthcare.

Our Manchester centre was established in 1999 and operates from the prestigious Manchester Science Park, situated in the heart of the Oxford Road Corridor.

I am currently on a trial and cannot believe the difference this has made to my quality of life. I have no doubt that had I have been on this drug before, I would not have needed to go through surgery.

Synexus patient

Our key research areas

We have vast experience in conducting research and our studies are grouped into therapy areas.

- Cancer Related Research
- Mind, Mood & Memory
- Respiratory
- Digestion & Bowel
- Chronic Pain
- Heart & Circulation
- Diabetes
- Skin Conditions
- Lifestyle
- Immunology & Vaccination
- Bones & Joints
- Urinary

Our facilities

Our new state-of-the art clinic is based on the ground floor, with our own entrance for patient ease and is fully equipped with excellent in-house resources.

We have 12 consulting rooms offering a welcoming environment for out patients. Synexus Manchester has close relationships with private local hospitals - The Spire, Nuffield Health and Circle Health Group.

The clinic is surrounded by pleasant, landscaped areas, has full disabled access and facilities to all buildings and plenty of free car parking for our visitors.

Research opportunities

Our informed consent process is designed to help give you all the information that you need as well as an opportunity to ask questions and decide what is right for you.

Our team will talk through your current health and advise you about any research you may be suitable for. If you want to go ahead, we will arrange a consultation with a doctor or nurse from our Manchester clinic to give you full study details to take away and discuss with your family before you make a decision.

You're under no obligation and are free to change your mind at any point. If you decide to take part, we will keep your GP fully informed and participation won't interfere with any NHS treatments you're already receiving.
