Together for the future of health

As the largest clinical study organisation in the world, we provide a friendly, relaxed environment where you have the chance to help shape the future of health for yourself and others.

Whether discussing your progress over a cup of tea, or enjoying a complimentary breakfast after fasting for a blood sample, these personal touches make Synexus clinics a welcoming place for you to take part in a clinical study. Our waiting areas are stocked with complimentary refreshments and a selection of magazines and newspapers.

Our professional administration and medical team are dedicated to providing the highest standard of service to all our visitors.

The benefits of taking part

- You will be contributing to the future of medicine

۲

- You will be assessed and cared for by qualified doctors and nurses
- You're offered specialist advice and support throughout the study

You will be joining the growing community of over 14,000 Synexus volunteers currently participating with us

We offer complimentary routine health checks; height, weight, body mass index (BMI), blood pressure monitoring and blood cholesterol checks

Our location

Synexus Clinical Research Centre, University Hospital of North Tees, Hardwick, Stockton on Tees TS19 8PE

We are located within North Tees University Hospital, on the outskirts of Stockton town centre.

- taxi ride from Stockton railway station.
- operates between Stockton town centre and the hospital, and towns and villages nearby.

Together for the future of health Introducing Synexus

A partnership with North Tees & Hartlepool NHS Foundation Trust aiming to increase the North East's clinical research opportunities

at North Tees University Hospital

AN INVITATION TO FIND OUT MORE ABOUT CLINICAL TRIALS AND TO BENEFIT FROM A **COMPLIMENTARY HEALTH CHECK**

13/06/2017 09:43

SYNEXUS | clinic

Synexus continues to grow in the UK and specifically in the North East of England.

۲

Hot on the heels of the successful development of our Hexham site, we are delighted to announce the launch of a new research site at North Tees Hospital, Stockton on Tees.

This will be the 9th Synexus site in the UK and marks a key strategic collaboration with North Tees University Hospital, another productive partnership with the NHS.

Dedicated to conducting clinical studies, Synexus have been investigating the effectiveness of new medicines and treatments for more than 20 years.

> "I am currently on a trial and cannot believe the difference this has made to my quality of life. I have no doubt that had I have been on this drug before, I would not have needed to go through surgery." Synexus patient

Our key research areas

We have vast experience in conducting research and our studies are grouped into therapy areas.

Cancer ResearchMind, Mood &
MemoryRespiratoryDigestion & BowelChronic PainHeart & CirculationDiabetesSkin ConditionsLifestyleImmunology
& VaccinationBones & JointsUrinary

Research opportunities

Our informed consent process is designed to help give you all of the information that you need as well as an opportunity to ask questions.

Our team will talk through your current health and advise you about any research you may be suitable for. If you want to go ahead, we will arrange a consultation with a doctor or nurse from your local Synexus clinic to give you full study details to take away and discuss with your family before you make a decision.

You're under no obligation to continue once you've started the study. If you change your mind at any point, you don't need to give a reason. It won't interfere with any NHS treatments you're already receiving and we will keep your GP fully informed.

COMPLIMENTARY HEALTH CHECKS NOW AVAILABLE

We'd like to invite you to find out more about clinical trials and to benefit from a complimentary health check.

We're also currently recruiting for studies relating to Type 2 diabetes and cardiovascular disease.
